SUMMARY

Defense-oriented Cybersecurity Analyst with a B.Tech in Information Technology and specialized corporate training in Network Security and Threat Intelligence. Proficient in Linux systems, Python scripting, penetration testing tools, and SIEM infrastructure, with experience in log analysis, vulnerability assessment, and incident mitigation frameworks. Developed an Automated Network Intrusion Detection Framework to deliver actionable insights for threat containment.

EDUCATION

2015 Calcutta Girls' High School

Indian Certificate of Secondary Education

472

2017 Calcutta Girls' High School

Indian School Certificate

345

2017 Indian Institute of Hardware Technology

Global Diploma in Network Security

A+

2017–2021 Heritage Institute of Technology

B.Tech Information Technology

CGPA = 7.85

2026 Cyber Defence Academy

Advanced Threat Intelligence & Ethical Hacking

9.5/10

SKILLS

- Linux System Administration
- Kali Linux Tools
- Wireshark Packet Analysis
- Nmap Scanning
- Metasploit Framework
- Splunk SIEM Enterprise
- Python Automation Scripting
- Bash Core Scripting
- Firewall Rule Architecture
- Cryptographic Protocols
- AWS Security Controls
- Identity & Access Management
- OWASP Top 10 Auditing
- Vulnerability Assessment
- Network Penetration Testing
- Burp Suite Professional

PROJECTS

• **Automated Network Intrusion Detection Framework**

This project uses custom network sniffing scripts and signature matching algorithms to spot anomalous internal traffic patterns, helping corporate IT departments isolate compromised assets instantly and mitigate zero-day security risks.
